LifePro Asset Management is a registered investment adviser. Information presented herein is for educational purposes only and does not intend to make an offer or solicitation for the sale or purchase of any specific securities, investments, or investment strategies. **Investments involve risk and are not guaranteed.** Any action taken based on this information is taken at your own risk. This information does not address individual situations and should not be construed or viewed as any typed of individual or group recommendation. Consult with a qualified financial adviser, tax professional, and/or legal counsel before implementing any securities, investments, or investment strategies discussed. **Performance Disclosure: Past performance is not indicative of future performance.** Portfolio performance is the result of the application of the LifePro Asset Management's proprietary investment process for the relevant time period. The performance calculations have not been audited by any third party. Actual performance of client portfolios may differ materially due to the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the length of time various positions are held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio. Portfolio performance is shown net of the product fee of 1%, the highest fee charged by LifePro Asset Management and transaction fees. Performance does not reflect the deduction of other fees or expenses, including but not limited to independent advisory fees, brokerage fees, custodial fees and fees and expenses charged by mutual funds and other investment companies. The data used to calculate the model performance was obtained from sources deemed reliable and then organized and presented by LifePro Asset Management. Model Performance Disclosure: For the Capital Preservation 2017 (Modeled) results are theoretical and do not reflect any investor's actual experience with owning, trading or managing an actual investment account. Thus, the performance shown does not reflect the impact that material economic and market factors had or might have had on decision making if actual investor money had been managed. Benchmarks: Portfolio performance results shown are compared to the performance of various indices. The index used by LifePro Asset Management have not been selected to represent an appropriate benchmark to compare an investor's performance, but rather are disclosed to allow for comparison of the investor's performance to that of certain well-known and widely recognized indices. Indices are not typically available for direct investment, do not include reinvested dividends, are unmanaged and do not incur fees or expenses. The S&P 500 Price Index is an unmanaged index of 500 widely held, predominantly large capitalization, U.S. exchange-listed common stocks. S&P Dividend Aristocrats Index includes 52 companies among the S&P 500 SPX, that have raised dividends each year for at least 25 years. Bloomberg Barclays US Aggregate Bond Index is a market capitalization-weighted index used to represent investment grade bonds being traded in United States. The index includes treasuries, government-related and corporate securities, agency fixed-rate and hybrid adjustable rate mortgage pass-throughs and asset backed securities.
